

# West Virginia Farm Bureau Foundation

is focused on sharing awareness and understanding of agriculture through educational programs for all ages.

The Foundation strives to build relationships between farmers and consumers by illustrating the roles the environment, the economy and technology play in bringing consumers the products we have come to expect from American agriculture.

The Foundation works to overcome growing misconceptions about agriculture, reconnecting West Virginians with the men and women who grow and produce our food.

By equipping leaders with skills, training and a variety of resources, the Foundation can enable those who produce our food to do so more efficiently and effectively.

The West Virginia Farm Bureau Foundation provides opportunities for schoolchildren and teachers to learn about agriculture, and in the future, help high school and college students pursue their dreams through scholarship funds. Your donations can help make this a reality.

# West Virginia Farm Bureau FOUNDATION

*Advancing the Education  
of Our Future Generation...  
One Student at a Time*

## Mobile Ag Ed Science Lab

Today's students are at least three generations removed from the farm, and the Mobile Ag Ed Science Lab is the only opportunity most children will have to learn about where their food actually comes from.

The Mobile Ag Ed Science Lab provides elementary students with the unique opportunity to participate in hands-on lessons that reinforce their knowledge of science, technology, English and math, while they are simultaneously introduced to agriculture education.

Our "Ag on the Move" program allows students to experience agriculture-related science experiments that cover West Virginia Content Standard Objectives in the Mobile Lab parked just outside of their school. In the Lab, students learn about the products that come from West Virginia while creating a lasting memory and expanding their knowledge.

## Summer Ag Institute

Summer Ag Institute is an annual two-day workshop for teachers who want the opportunity to earn graduate or professional credit from WVU and gain valuable information, teaching materials, lesson plans and activities about agriculture to take back to their classrooms. Teachers who attend Summer Ag Institute participate in a variety of workshops and are taken on several agriculture-related tours that allow them to see first-hand what goes into the production of food, fiber and fuel that America's farmers provide to the world.

## Agriculture Scholarships

West Virginia Farm Bureau Foundation is endeavoring to provide scholarships to West Virginia students who pursue an ag-related field in college. Scholarships could be awarded at the state and county levels, and could vary depending on the county.
